

# Direct observation of practical skills

Student's name \_\_\_\_\_

Group \_\_\_\_\_

Instructor's name \_\_\_\_\_

Discipline \_\_\_\_\_

## Assessment by the teacher of the discipline

### Intervention (procedures):

- Catheterization of the bladder
- Primary surgical debridement of wounds, removal and suturing
- Application of soft bandages for dislocations and sprains
- Anterior rhinoscopy, otoscopy, pharyngoscopy
- Removal of foreign body
- Gastric lavage
- Sampling of material for microscopic, bacteriological studies (from the pharynx, nose, wounds, rectum, etc.)

| Evaluation of practical skills | "5" (excellent) - fully knows the practical skills and skills provided by the working program of the discipline | "4" (well) - fully knows practical skills and skills, but with some inaccuracies | «3» (satisfac.) – knows a little bit about practical skills | «2» (unsatisfac.) – demonstration of clinical skills with errors |
